Sender

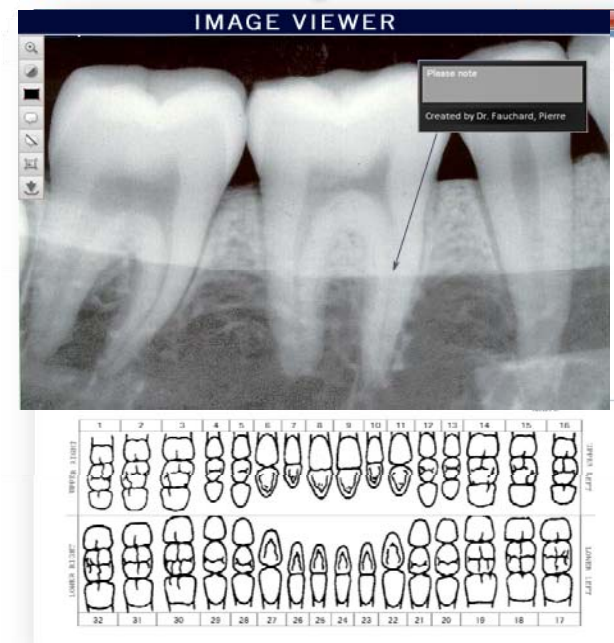

- Step 1 – Choose recipient from pull-down list
- Step 2 – Choose patient from pull-down list
- Step 3 – Drag and drop files to be sent
- Step 4 – Optional – add comments, annotations
- Step 5 – Hit send button

The screenshot shows the 'Stat Image File Transfer' web application. It features a 'Patient:' dropdown menu, a 'Drop files anywhere to upload' area with a 'Select Files' button, and a note that the 'Maximum upload file size: 64MB'. Below this is a 'Doctor:' dropdown menu and a 'Message:' text area. A red 'Send' button is located at the bottom right. At the bottom of the interface is a dental arch diagram with tooth numbers 1-16 on the top and 17-32 on the bottom.

Recipient

- Step 1 – Open Email
- Step 2 – Select Link

Background Activity

- Populate dropdowns with patient and recipient info from database
- Attach pertinent patient information to message
- Assign and acknowledge recipient
- Certify attachment
- Generate encryption key with expiry date
- Encrypt attached files
- Encrypt protected healthcare information
- Log transaction and assign transaction ID

Encryption Concept
